1. DETAILED ACTION

2. Claims 1-21, 23-26 and 28-42 have been examined.
3. Acknowledgement of papers filed: claims and remarks filed on 23 May 2008.

These papers filed have been placed on record.

***Claim Objections***

4. Claims 28-30 are objected to because of the following informalities: the language "machine-readable medium" lacks antecedent basis and is perhaps better written as "machine-readable memory" to match the language of claim 26. Appropriate correction is required.

***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-20 and 31-42 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Paragraph [0025] of the specification states that, "although software and hardware are described to control certain functions, such functions can be performed using either software, hardware or a combination of software and hardware." In light of this language, the apparatus claims 1-20 and 31-42 constitute software per se and are, therefore, non-statutory as claimed. To remedy this, Examiner recommends amending the claims to explicitly state that the invention is limited exclusively to hardware.

***Allowable Subject Matter***

7. Claims 21, 23-26, and 28-30 are allowed over the prior art.

***Conclusion***

The following is text cited from 37 CFR 1.111(c): In amending in reply to a rejection of claims in an application or patent under reexamination, the applicant or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. The applicant or patent owner must also show how the amendments avoid such references or objections.
